

Cleaning Your Lashes

It is very important to keep your lashes clean! Failure to do so can result in irritation and possible infection.

Remove eye makeup carefully using an oil free foaming cleanser.

Apply the foaming lash shampoo to the lashes using gentle, upward strokes and rinse well with tepid water.

Carefully dab off excess water and groom your lashes with your mascara wand.

Do not pick or pull at your lashes and avoid using mascara on extensions.

Caring for Your Lashes

Do not touch or get lashes wet for the next 24 hours.

After this time, you can clean them gently (must be an oil free cleanser) and lightly brush them upwards with the brush provided.

Keep visits to a sauna, steam room and swimming pool to a minimum and avoid hot steam from the shower for the next 48 hours.

Do not use any oil based products on or around the lash area.

Lashes must be filled every 2-3 weeks. Maximum 4 weeks with a minimum of 30% remaining retention.
